

## CITIZENSHIP

We are not just a business – we are members of the communities in which we conduct our business. Since 1983 PMI has been giving back to our local, national, and international communities through non-profit groups dedicated to children, education, and the environment. We are proud to support the following organizations:

BOYS & GIRLS CLUBS

## ABOUT PMI

**Established** in 1983, privately-held Pacific Market International (PMI) designs, manufactures and markets industry-leading food and beverage solutions for our nearly 100 year-old brands, STANLEY® and ALADDIN® as well as a private label business for select globally recognized companies.

**While** we're proud of our accomplishments in the market, we're even more proud of our company culture. After 25 years, PMI is still deeply rooted in human values and committed to education, sustainability and ethical business practices. We will continue to move forward with a commitment to these values - values we hope to cultivate and share with our customers and business partners.

**PMI** is headquartered in Seattle, Washington, with offices in Shanghai, London, and Manila.

**Please** visit our web site, [www.pmi-worldwide.com](http://www.pmi-worldwide.com) for more information.

## SUSTAINABLE SUPPLY CHAIN

We know that “doing business right” is the right way to do business. Retailers and consumers can trust that products manufactured by PMI are done so under the industry’s best practices.

**In 2006 and again in 2008, PMI was recognized by the American Chamber of Commerce in Shanghai with their “Corporate Social Responsibility Award” for corporate governance, environmental stewardship, social impact and workplace practices.**

Out of our commitment to sustainable business, PMI:

- ▶ Sources all raw materials from reputable global suppliers through a robust material process control system.
- ▶ Manages a small but deep factory base with suppliers that embrace and abide by our CSR initiatives.
- ▶ Rises to the challenge of global regulatory compliance in order to grow our business as we design, manufacture and ship to 67 countries.
- ▶ Continues to be actively engaged in social compliance. We know that safe and fair factories make for healthy, satisfied employees and, consequently, better products.
- ▶ Focuses on Environmental Management Systems, emphasizing ISO 14001 certification for factories, water recycling, and reduction and recycling of waste.
- ▶ Remains committed to the values that have successfully and ethically led our company since its founding in 1983.

## RECYCLED PRODUCTS

eCycle®, PMI's proprietary mix of recycled plastics, was born from passionate PMI employees looking for a way to make a difference. Their dedication to living sustainably was infectious, and today we not only produce products made from recycled materials, we incorporate green practices wherever and whenever possible.

In recognition for its innovation and relevance, the International Forum Design, or iF, awarded eCycle a Materials award in 2009, making it a globally recognized sustainable material.

On average eCycle contains 95% recycled plastics, of which 25% is post consumer content\*. It is fully compliant with both the US Food and Drug Administration (FDA) and European Union regulations, BPA Free\*\*, and recyclable where [5] plastic is collected.

\*There are 3 different eCycle blends: injection molding polypropylene (100% recycled polypropylene with 25% post consumer content), blow molding polypropylene (90% recycled polypropylene/10% virgin polypropylene, with 22.5% post consumer content) and polycarbonate (100% recycled polycarbonate with 40% post consumer content.) Visit our Aladdin® website for more information at [www.aladdin-pmi.com](http://www.aladdin-pmi.com).

\*\*All eCycle products are BPA Free on food contact surfaces.

## INNOVATIVE SOLUTIONS

In 2008, PMI and a North American retailer joined forces to bring new life to 100,000 polycarbonate water bottles. In the wake of consumer confusion around polycarbonate products containing Bisphenol-A, or BPA, they proactively stopped selling all bottles containing it. Having heard of our recycling capabilities, the retailer came to PMI seeking a sustainable solution to the unused bottles so that they didn't end in a landfill.

The result: the Aladdin® eCycle Recycled and Repurposed Travel Mug. It features recycled, polycarbonate water bottles as the outside surface while the lid and inside liner (all food-contact surfaces) are made from recycled polypropylene, a BPA-free plastic. The mugs contain 85% recycled plastic, 30% of which is post-consumer content.

This is an example of the innovation we know to be possible and repeatable when companies with a shared vision partner together.
